*The information provided in this list is based on data obtained from the U.S. Patent and Trademark Office. For this report, a university is defined as an institution that grants undergraduate-level degrees. Patents reported are utility patents granted during the 2017 calendar year. When a patent is assigned to one or more entities, credit is given to the first named entity. The number of patents granted does not necessarily indicate the value of a university's technology, the effectiveness of its research or whether its patents will be successfully licensed and/or brought to market.
