NATIONAL SCIENCE BOARD
SCIENCE AND SOCIETY
AWARD WINNER

The National Academy of Inventors is honored to have received the 2024 Science and Society Award from the National Science Board (NSB) in recognition of its “extraordinary efforts to honor and support inventors.”

The Academy was selected for its engaging and inclusive initiatives to strengthen and diversify the innovation economy.

“Their unique approach not only helps stimulate the innovation economy, but also makes science and engineering more inclusive and diverse.”

- Dario Gil, Chair of the NSB's External Engagement Committee

Established in 1996, the Science and Society Award recognizes individuals and organizations that have made significant contributions to enhancing public appreciation of science and engineering in the United States.

This year's award was presented by Dan Reed, Chair of the National Science Board, during the National Science Foundation Awards Gala on May 1, 2024, at the historic Renwick Gallery in Washington, D.C.

“I'm so proud of how far we've come in just over a decade,” said Paul Sanberg. “We are honored to be recognized with the Science and Society Award from the NSB and look forward to continuing to grow and evolve the Academy to address the needs of the innovation ecosystem.”
